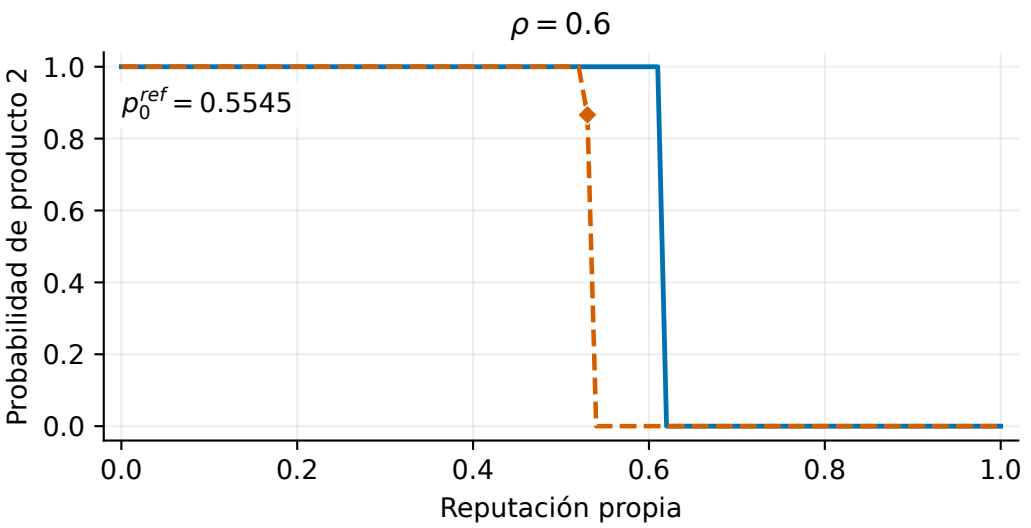
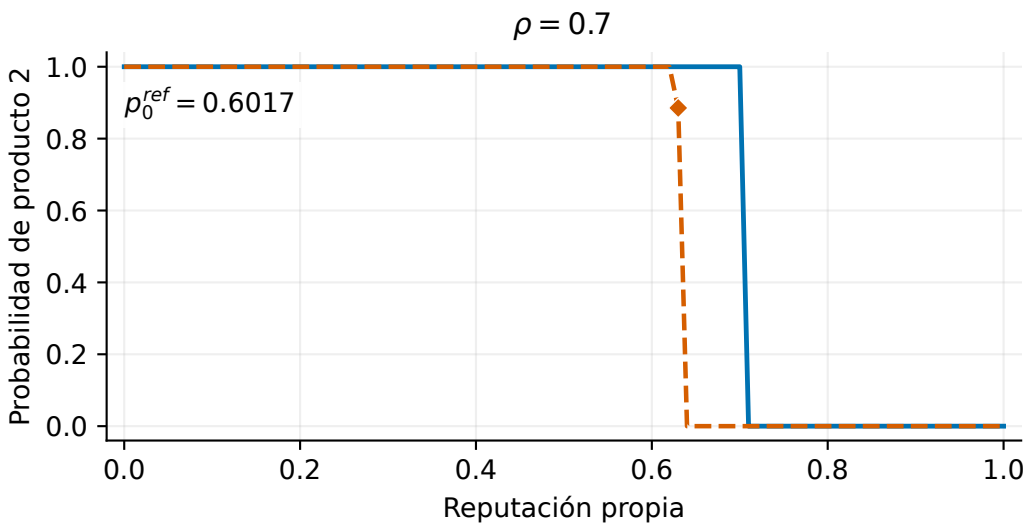
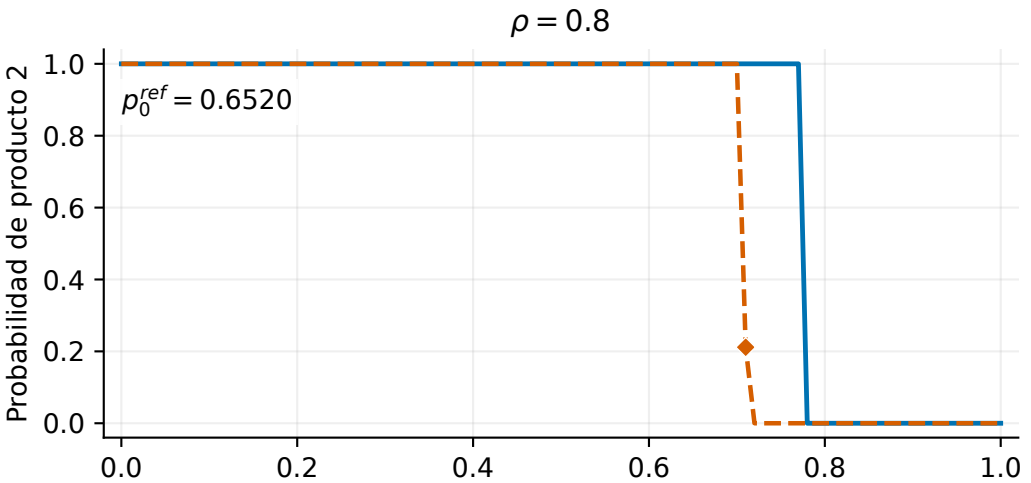
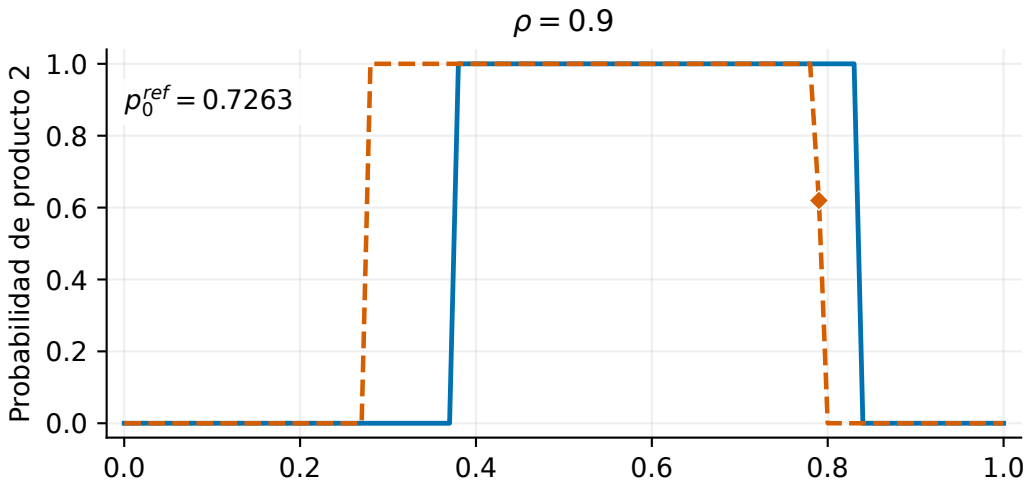
Políticas con referencia igual a la calidad media del rival endogenous p0

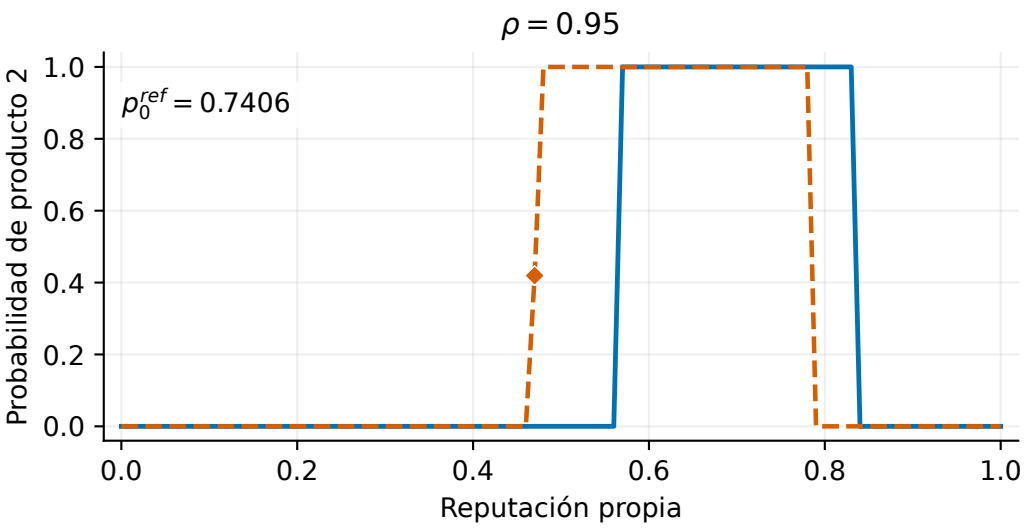
Monopolio con $p_0 = p_0^{ref}(\rho)$ · Endogenous p0 (OE p0) · Mezcla en un nodo OE p0

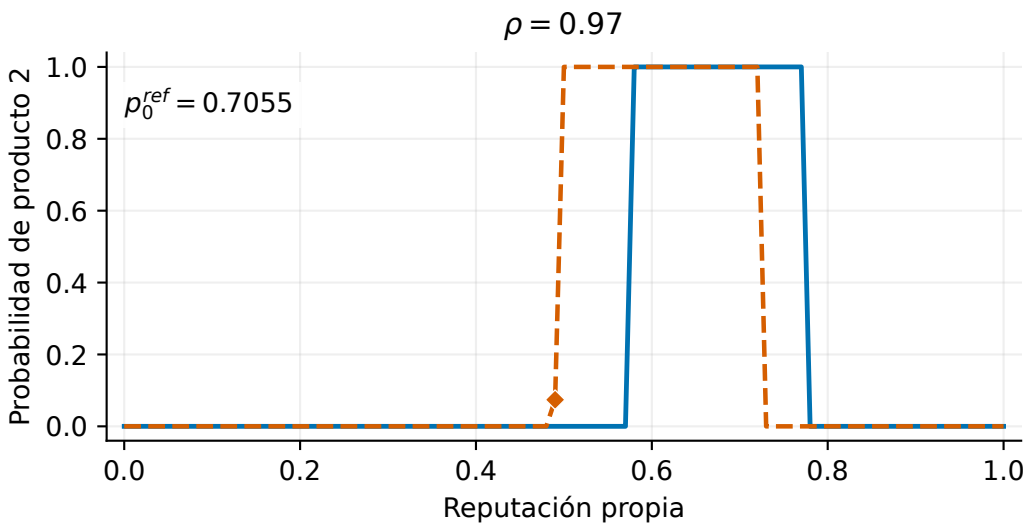


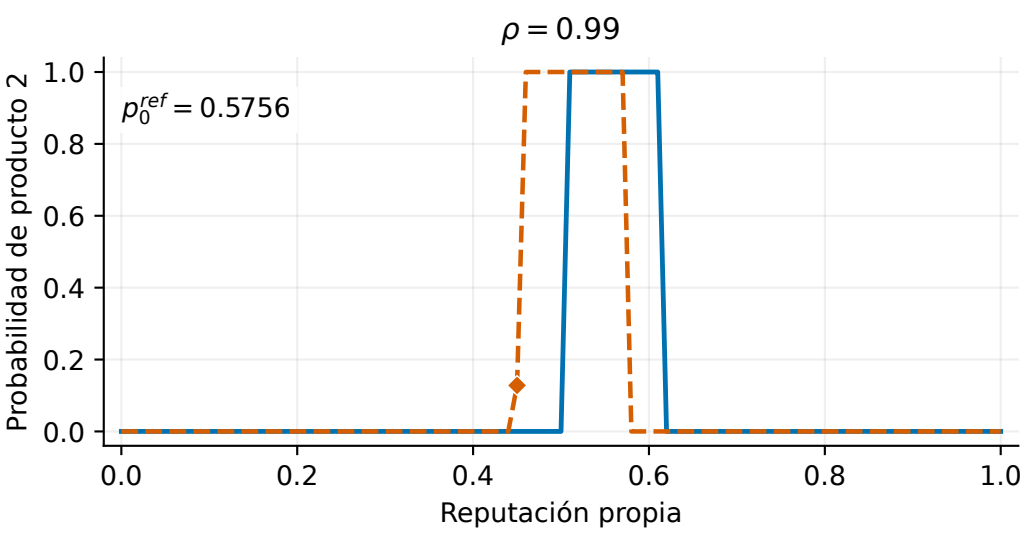












Grilla común n=101 · selector puro original del monopolio · líneas unen nodos resueltos · calidad calibrada desde OE p0, sin nuevo cierre.

$p_0$ref denota calidad entre ventas; el escalar endógeno del equilibrio conserva su definición.
