Equilibrium sets of initial conditions
Each interval contains the common initial reputations that converge to its conjecture.
$p_0 = 0.1$
$p_0 = 0.3$
$p_0 = 0.5$
$p_0 = 0.7$
$p_0 = 0.8$
$p_0 = 0.9$
Admissible common initial reputation x_0
0.0
0.2
